Healthcare Sheeting by StandardTextile

PERVAL®

PROVEN PERFORMANCE

COTTON SOFTNESS, CENTIUM TOUGHNESS.

Our patented PerVal® fabric puts pleasingly soft cotton next to the patient skin and exceptionally durable synthetic microfilament fibers in the core. This plain weave fabric is made with our proprietary Centium Core Technology®, using long-staple ring-spun cotton and synthetic microfilament yarns. The 70/30 cotton/synthetic blend construction assures patient comfort while dramatically increasing product strength and durability. You'll enjoy a significantly lower cost per use compared to traditional cotton/poly sheets.

LONG-LASTING VALUE.

PerVal offers excellent whiteness retention and stain-release performance to ensure you're always presenting your best image. It's distinguished by a bleached, natural finish that extends product life by eliminating unnecessary, resin-based "no-iron" chemistry. Sheets and pillowcases are pre-laundered and delivered to you ready to use, a welcome convenience that delivers quantifiable cost savings to your operation.
