

CENTIUM CORE TECHNOLOGY®

CENTIUM CORE TECHNOLOGY®
Sheeting Innovation by StandardTextile

PATENTED PERFORMANCE

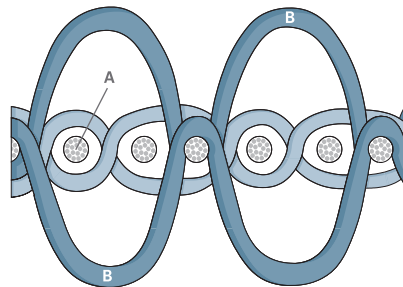

AN INNOVATIVE WEAVING TECHNOLOGY FOR SHEETING, DEVELOPED EXCLUSIVELY BY STANDARD TEXTILE

Centium Core Technology® is a patented weaving technology available exclusively in sheeting products manufactured by Standard Textile. Utilizing proprietary Optimized Polymer Performance Enhancement engineering, Centium Core Technology sheets and pillowcases offer a sensuously soft feel, combined with the strength and durability previously unattainable in hospitality sheeting products.

In addition, Centium Core Technology sheets and pillowcases are engineered to deliver exceptional whiteness retention, superior stain release characteristics, and the ultra smooth hand of a true single pick construction. Moreover, Centium Core Technology products retain a remarkably exquisite feel throughout their extended service life.

To learn more about Standard Textile's Centium Core Technology®, or to contact a dedicated hospitality consultant, please visit standardtextile.com or call 1.800.323.5246.

The Cotton surface is woven around the Centium Core for a unique construction that enhances comfort, increases strength and extends product life.

A - Centium Core Synthetic Microfilament Yarns

B - 100% Cotton
