# Superior comfort and hygiene.

## THE ULTIMATE IN SKIN PROTECTION.

ComPly® is a patented tri-component construction that wicks fluid away from the patient through its quick-drying, non-absorbent top surface, pulls the fluid through a unique 50/50 synthetic/cotton middle ply, and traps the fluid in a super-absorbent all-cotton lower ply. This enhances patient care management by reducing moisture, shear, and friction against your patient's skin.

## BETTER LAUNDRY PERFORMANCE.

ComPly® is also available in a laminated unipad construction that extends service life, enhances durability, reduces mechanical damage, and folds more easily and efficiently. ComPly® Excel Plus lays flatter for a more comfortable fit beneath the patient. Both versions of ComPly® save up to 50% over the total cost of disposable systems.
