

TWILL PRINT

TWILL PRINT
Incontinence Products by Standard Textile

Designed for dignity.

IDEAL FOR MOBILE PATIENTS.

Our Twill Print underpad is designed with patient dignity in mind. The cotton/polyester face fabric is adorned with an attractive print that complements many healthcare interiors and isn't immediately recognizable as an incontinence product. The print is effective at disguising incidental staining yet offers "clinical white space" allowing medical professionals to identify concerns. The twill weave face is also very comfortable for patients.

Twill Print is a conventional two-piece fabrication with square corners, incorporating a polyester/rayon soaker and polyknit vinyl barrier in addition to the 55/45 blend face fabric. It offers a scalloped diamond quilt pattern and is merrowed on four sides.

55/45
Cotton/Polyester Face

80/20 Polyester/Rayon
Soaker

Tan Polyknit Barrier

33" x 36"
