

POLYLITE

POLYLITE
Incontinence Products by Standard Textile

PolyLite & PolyLite Plus

Soft to the touch.

ACCELERATED DRYING.

PolyLite features a lightweight brushed tricot surface that dries more quickly than cotton and blended underpads to save processing time. So soft it's often preferred for comfort, the face fabric is treated with a soil-release finish. A polyester/rayon soaker fabric and polyknit vinyl barrier form the rest of the conventional two-piece fabrication with square corners.

BETTER LAUNDRY PERFORMANCE.

PolyLite is also available in a laminated unipad construction that extends service life, enhances durability, reduces mechanical damage, and folds more easily and efficiently. PolyLite Plus lays flatter for a more comfortable fit beneath the patient.
