# PerVal® & PerVal® Plus

## Comfort and Value.

### SKIN-SAVING PROTECTION.

The face of PerVal® is made of a textured warp-knit synthetic that disperses moisture more effectively than brushed-tricot underpads. PerVal® offers a solid blue face fabric to more readily disguise incidental staining. A polyester/rayon soaker and blue polyknit vinyl barrier complete the conventional two-piece fabrication, which features square corners.

### BETTER LAUNDRY PERFORMANCE.

PerVal® is also available in a laminated unipad construction that extends service life, enhances durability, reduces mechanical damage, and folds more easily and efficiently. PerVal® Plus lays flatter for a more comfortable fit beneath the patient.
