Protection at a lower weight.

LIGHTWEIGHT AND EFFECTIVE

The EuroTech® underpad features a 100% brushed polyester face fabric that is notable for both comfort and moisture wicking performance. The pastel aqua color of the pad surface creates a less institutional appearance and is helpful in managing incidental staining. EuroTech® underpads are fabricated with a polyurethane-coated barrier backing that reduces overall pad weight and bulk by more than 25% as compared to conventional vinyl-barrier pads, which can dramatically and positively impact processing expense.

LONG-LASTING PERFORMANCE

The single-ply laminated construction of EuroTech® underpads eliminates differential shrinkage between component layers, enhances durability, and extends service life. This lightweight underpad positions more comfortably beneath the patient and folds more consistently and efficiently in the laundry.

Scalloped Wave Pattern

Merrowed on Four Sides

Rounded Corners

33" x 35"
