standard
for success

At Standard Textile, we've been servicing healthcare, hospitality, educational and commercial industries since 1940 with a vision for helping customers provide a healthier, safer, and more inspiring experience.

Since then, we've developed a deep understanding and appreciation for facility design and its role in advancing positive outcomes.

That's why we've created the strongest interiors contract team in the country.

From design consultation to fabric development to fabrication and installation, our turnkey approach fosters collaboration and progressive thinking with one goal in mind: *Your success.*

Our passion for customer success and relentless pursuit of making a positive impact on the world are guiding principles at Standard Textile.

We live these principles, daily.

If we can leverage our eight decades of experience to help our customers achieve their goals while helping to improve the experience of others, then that's what we consider our standard for success.

design. expertise. fabrication.

our story

We've been providing decorative products to the healthcare market since 1940. At that time, our sales consultants were visiting hospitals daily, selling primarily sheets, towels, and apparel when customers began asking if we could also provide cubicle curtains and drapery. As demand for decorative products grew, we established our first workroom on the third floor of the company's headquarters in Reading, Ohio in 1960 to better service our customers.

Our fabrication offering quickly expanded beyond cubicle curtains and drapery to include bedspreads, upholstery, and other decorative products. By 1980, in addition to hospitals, we were servicing hotels, corporate offices, restaurants, and retirement communities. Today, we're marketing our offerings as Standard Textile Interiors and service the healthcare, hospitality, educational, and commercial markets.

turnkey solutions

FOR CUSTOM PROJECTS

QUALITY FABRICATION

Our custom-fabricated products are of the highest quality, created and tested by professionals.

ESTIMATING

We offer fast, accurate quotes for your project.

PRODUCT TESTING

Our on-site product testing laboratory allows us to uphold our commitment to the highest possible quality assurance.

DESIGN CONSULTATION

Work with our team of interior designers to find the perfect patterns, fabrics, and products.

VALUE ENGINEERING

We understand the needs of matching your budget with your vision.

INSTALLATION

We have a team of dedicated professional contractors located throughout the country to handle installation.

PROJECT MANAGEMENT

Minimize the complexity of your project. From pre-planning to on-time delivery, we can help.

MEASURING

Accurate measurements ensure custom pieces are a perfect fit.

QUALITY ASSURANCE

A final walkthrough is conducted to ensure specifications, installation, and quality expectations are successfully met.

solar shades

Standard Textile is a global leader in the provision and installation of solar shades—a highly durable window treatment that offers the beauty of outdoor views, while still maintaining privacy.

manual

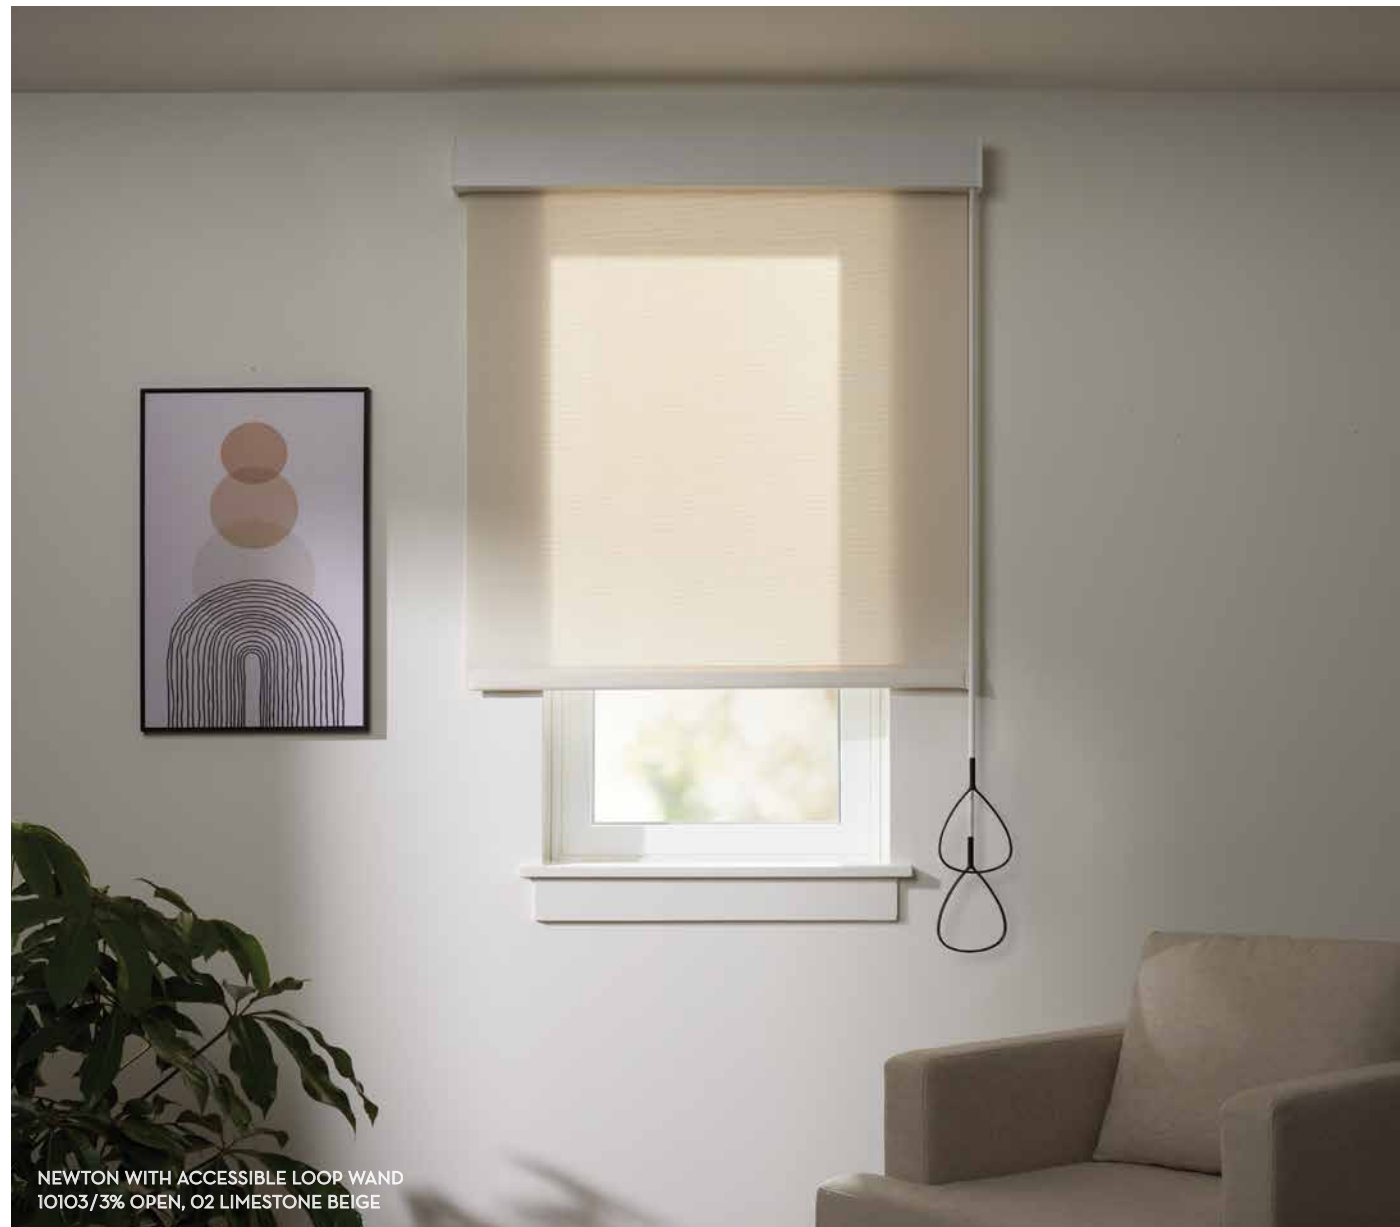

Solar shades that are raised and lowered manually. Simple yet effective. Allows residents, patients, or staff the freedom to control the amount of light they let into their room.

motorized + automatic

Solar shades that can be raised and lowered mechanically. Intuitive control allows for the greatest accessibility for residents, patients, or staff.

shadecloth options

Our range of shadecloths offers options for all room types. Choose from light-filtering sheers, decorative shadecloths, and blackout materials in solids and textures that add a clean and simple look to any space. Looking to make a statement in a room with a custom solar shade? Partner with our design team to bring your brand to life with unique art or designs, made and printed to order.

CANOPY CUSTOM-PRINTED BLACKOUT

solar shades with newton high-speed lite-lift® technology

Revolutionize shade control with our most elegant manual shade option.

A CHAIN-FREE SOLAR SHADE EXPERIENCE

Solar Shades with Newton High-Speed Lite-Lift® Technology ("Newton") offer a smooth, one-handed operation that's as simple as a gentle pull. This patented chain-free solar shade design simplifies operation, enhances durability, and improves product safety.

Newton is available in a standard wand or a more accessible loop wand. Both can be operated with one hand and require minimal force, meeting the needs of users of all abilities.

Our range of shadecloths offers options for all room types. Choose from blackout, light-filtering, and custom-printed options to meet the needs of any space.

Newton complies with the industry-recognized safety standard (ANSI/WCMA A 100.1-2022) for window coverings. In addition, this innovative solar shade technology has been certified as "Best for Kids", a safety program sponsored by the Window Covering Manufacturers Association (WCMA).

more window treatments

PINCH PLEATED DRAPERY IN PIVOT/BEACHFRONT

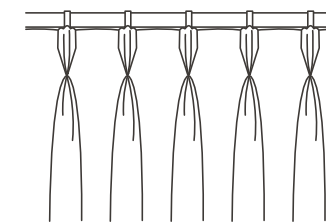

We've been manufacturing window treatments for decades and have developed a solid process that ensures exceptional quality and timely deliveries. Ownership of the manufacturing process, from beginning to end, allows us to control each step of production.

Our window treatment offerings include:

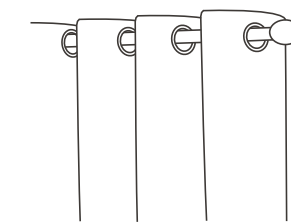

- DRAPERY
- SHEERS
- ROMAN SHADES
- BLINDS
- TOP TREATMENTS

sheers + blackouts

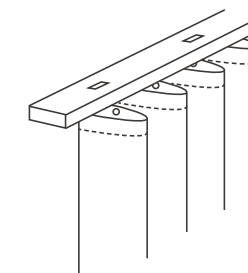

Make a statement or complement your existing décor while protecting against harsh sunlight and providing a reassuring sense of privacy with light-filtering sheers and blackout fabrics. Available as pinch pleated, grommeted, ripple fold, accordia-fold, and rod pocket.

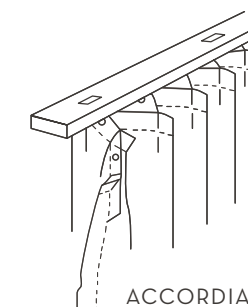

PINCH PLEATED

GROMMET TOP

RIPPLE FOLD

ACCORDIA-FOLD

ROMAN SHADE IN NOLITA/GRASSCLOTH

roman shades

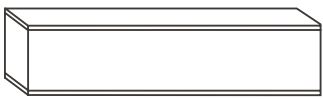

Add a finishing touch to your window with roman shades that can be customized to your facility's specification. A classic and timeless look, roman shades can be manufactured with drapery or sheer fabrics.

blinds

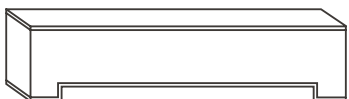

Easy to control light level. Also easy to clean. Available in 2" faux wood, mini, and vertical.

top treatments

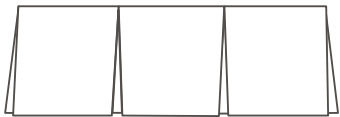

We have the fabrication and manufacturing capabilities to handle any custom project. We manufacture custom valances and cornice boards. Board-mounted valances, swags, and cascades are also available.

STRAIGHT CORNICE

STEPPED CORNICE

INVERTED BOX PLEAT VALANCE

privacy curtains

Design is essential to patient privacy, comfort, and safety, from the layout of the tracking system to fabric patterns, colorways, and finishes. Thoughtful choices not only enhance wellness but also support performance and protect patients and caregivers.

a solution for every room

As the nation's most experienced privacy curtain fabricator, we've partnered with leading healthcare systems for decades to deliver unmatched quality. We offer a complete portfolio of privacy curtain systems designed to meet your specific requirements, whether your priority is long-term durability, quick change-outs, or circularity.

Every curtain is proudly made in the USA by a dedicated team, then rigorously tested in our on-site lab to ensure durability and performance.

Our exclusive fabrics are inherently flame-retardant and exceed ACT performance standards. Privacy curtains can also be manufactured using customer-owned materials.

WILLOW PRIVACY CURTAINS

fabrics that *work for you*

woven

LAUNDERABLE AND REUSABLE

Our woven privacy curtains are designed to fit your space while enhancing comfort, functionality, and style. With more than 40 fabric patterns and over 200 colorways, it's easy to create the perfect look for your environment. A wide selection of mesh options, available in multiple colors, sizes, and types, ensures a cohesive design that supports both aesthetics and performance.

single-cycle

DISPOSABLE OR RECYCLABLE

For areas requiring quick change-outs and strict infection control, we offer disposable curtains, designed for extended but limited use. These solutions are ideal for high-infection areas, emergency departments, and other high-turnover spaces where speed and safety matter.

Many options are recyclable through our *circlify™*: curtains program, giving hospitals a responsible end-of-life pathway while reducing landfill waste.

They can also be custom printed with your own artwork or developed in collaboration with our design team to achieve the right look for your environment.

a variety of systems to meet your needs:

AMY™ all-fabric curtain

AMY™, the industry’s first all-fabric privacy curtain, features a **patented and award-winning** design for rapid change-outs and effortless laundering. Change-outs are up to 5x faster and AMY™ is 4x quieter* than traditional curtains.

on the right track®

On The Right Track® simplifies curtain replacement with patented split-ring technology that glides silently without hooks or snags. Paired with the Grabber® accessory, one person can change a curtain in minutes without a ladder.

snap systems

Perfect Panel® and other snap systems save time and costs with a snap-on feature that lets you replace only soiled panels, reducing laundering and inventory needs. The mesh stays in place, preventing sizing errors and minimizing downtime.

traditional

Traditional construction delivers a classic curtain that is sewn directly to the mesh. This design blends seamlessly into healthcare spaces while meeting everyday demands for privacy and ease of use.

MATERIAL OPTIONS:

Woven (reusable): Long-lasting fabrics engineered to withstand repeated laundering.

MATERIAL OPTIONS:

Woven (reusable): Long-lasting fabrics engineered to withstand repeated laundering.

Single-Cycle (disposable or recyclable): Designed for short-term use with an option to recycle through our *circlify*™ program.

MATERIAL OPTIONS:

Woven (reusable): Long-lasting fabrics engineered to withstand repeated laundering.

Single-Cycle (disposable): Designed for short-term use.

SUSTAINABILITY AT THE FOREFRONT

Curtains marked "**disposable or recyclable**" qualify for our *circlify*™ program. This circularity initiative helps facilities reduce waste by recycling mono-material curtains after use.

Some single-cycle curtains are **disposable** only. These are constructed from multiple materials that do not meet recycling requirements.

**In laboratory studies, AMY™ privacy curtains measured 4x less perceived noise during operation compared to traditional systems utilizing metallic hooks and plastic carriers.*

and services
you can count on

CINTAS® PRIVACY CURTAIN SERVICE

cubecontrol® cubical curtain management

Our privacy curtains can be paired with our CubeControl® Curtain Management App. Curtains can be quickly scanned to improve inventory management, monitor usage and confirm compliance with facility cleaning frequency policy, and promote a cleaner environment for patients and staff. Each curtain includes a CubeControl® label that indicates curtain size and room location to save time when reinstalling after cleaning.

cintas® privacy curtain service

The Cintas® Privacy Curtain Service, featuring curtains manufactured by Standard Textile, delivers a turnkey solution for healthcare facilities seeking to simplify operations, improve safety, and elevate the patient experience. This innovative program provides on-site evaluation, installation, and routine exchanges of hygienically cleaned curtains, helping reduce the risk of cross-contamination while ensuring compliance with infection prevention protocols.

With durable, stylish fabrics and a patented zipper system that allows curtain changes in under 30 seconds without the need for ladders, staff can focus more on patient care and less on curtain management.

circlify™: curtains

circlify™: curtains is a recycling program created by Standard Textile in partnership with Circular Blu to keep disposable curtains out of landfills and in the circular economy. Through a seamless process of replacement, recycling, and reporting, *circlify*™ ensures used curtains are transformed into new, meaningful materials rather than discarded as waste.

This innovative program not only reduces environmental impact but also helps healthcare facilities advance their sustainability goals with measurable results. No curtain wasted. Just a smarter, more responsible way forward.

shower curtains

We have an extensive line of shower curtains for healthcare environments, including fabric, vinyl, and sustainable solutions. We also offer a variety of options that are in stock and ready to ship.

hook-free

Hook-free shower curtains—available in either 100% Polyester or 10-gauge vinyl—deliver time-saving convenience along with durable beauty. The built-in, flexible white rings allow for quick, easy installation and removal in less than 45 seconds.

The vinyl hook-free shower curtains are water repellent and mildew resistant to help block unwanted odors. Weights are included in bottom corners to help the shower curtain stay in place.

Select styles offer an optional translucent window to allow light into the shower.

GROMMETED SHOWER CURTAIN IN BEZEL

grommets

Rust-proof metal grommets minimize curtain wear and tear. A grommets shower curtain slides easily over the rod and falls into neat, clean folds. Extremely functional and user friendly, grommets shower curtains can be installed, removed, opened or closed in an efficient and convenient manner.

eyelet

Shower curtains are available with reinforced sewn buttonholes to accommodate curtain rings. This style provides an uninterrupted visual expanse, accentuating the color and pattern of the curtain.

made to order

Custom-made curtains are available with a wide variety of fabrics and specification options. Custom-printed shower curtains are also available with our ImagePoint® printed design options. Supply your own art or partner with our design team to create a unique and one-of-a-kind branded piece.

hardware + liners

Shower curtain hardware and liners are available to match your unique needs.

CUSTOM-PRINTED

HOOK-FREE POLYESTER SHOWER CURTAIN
IN BAY BLOCKS WITH WINDOW

fabrics

Our dedicated team of interior professionals are here to help you with all things fabric. We have an extensive fabric collection designed specifically for healthcare, hospitality, educational, and commercial environments.

fabrics

From performance fabrics to eco-intelligent to anti-microbial to bleach cleanable. Our fabric offerings are precisely selected with your needs in mind.

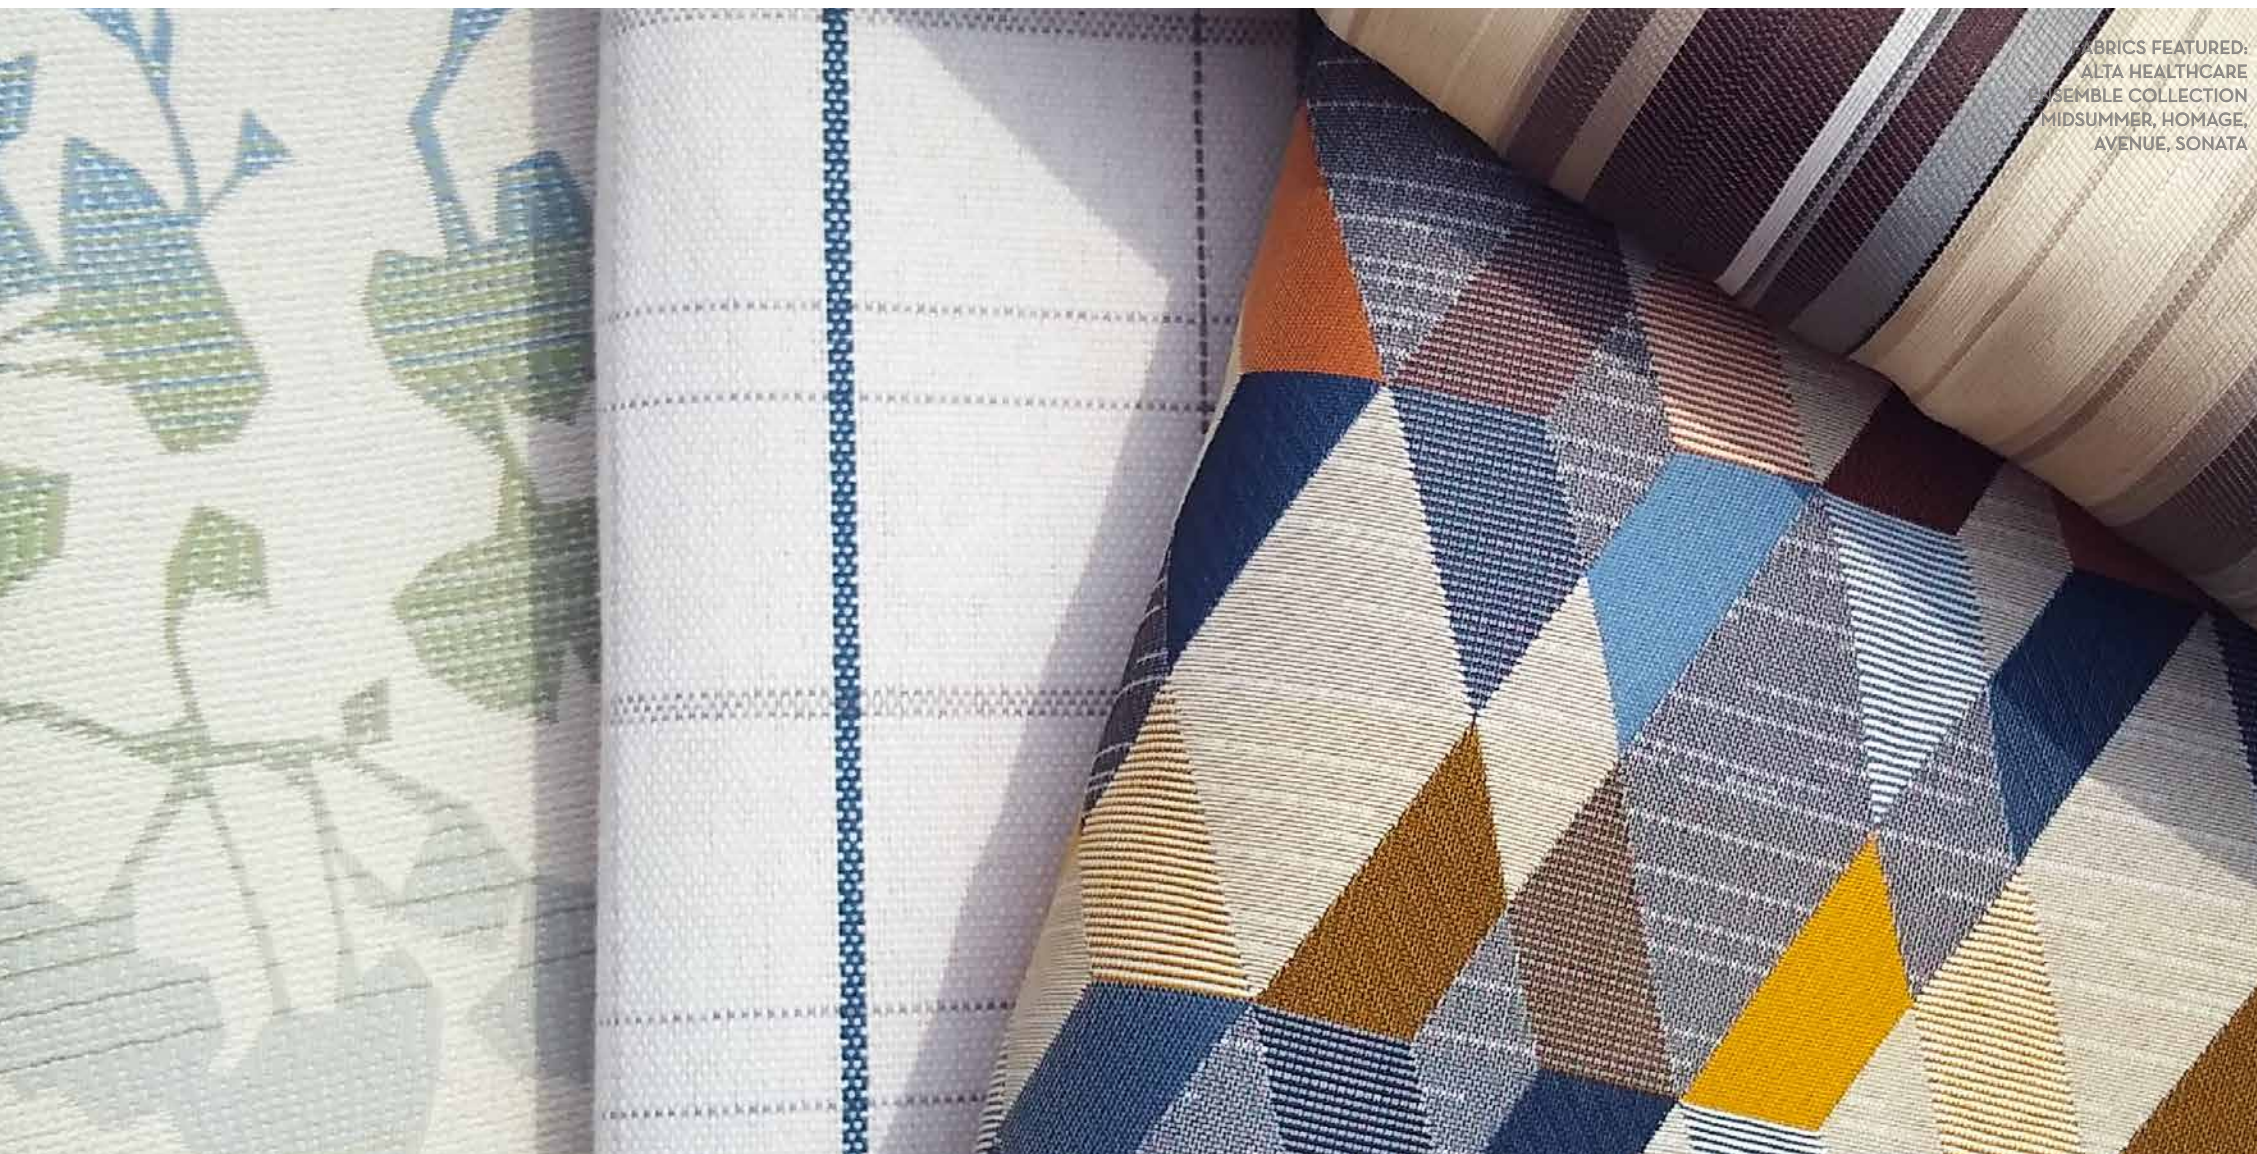

Fabrics resistant to stains, moisture, and UV are also available. Fabrics meet or exceed all ACT performance standards.

Application of our fabrics are suitable for:

- PRIVACY CURTAINS
- SHEER + BLACKOUT DRAPERY
- SOLAR SHADECLOTHS
- CORNICES + TOP TREATMENTS
- BEDDING
- UPHOLSTERY
- SHOWER CURTAINS
- AND MORE

upholstery fabrics

When it comes to covering bolsters, cornice boards, lounge seating, sofas, or chairs of all types, you need fabrics that perform as amazingly as they look. Our high-performance and stylishly designed fabric selections can be used for a variety of projects, both indoor, and out.

stunning fabrics that perform

Fabrics are at the core of who we are. We offer a variety of performance-based upholstery fabrics that balance style with incredible durability and toughness. Our assortment includes coated and woven upholstery, exclusive patterns and colors, collaborations with industry leaders, and hard working fabric finishes that extend the life of the fabric.

Trusted partners include:

- SUNBRELLA® CONTRACT COLLECTION
- CRYPTON®

bedding

QUILTED BEDSPREAD IN CASA/EUCALYPTUS

The bed is the centerpiece to any well-designed room experience. We have everything you need to make that experience as comfortable and visually stunning as possible.

duvets + bedspreads

Select from a dynamic and modern collection of patterns, colors, quilting styles, and sizes. Or create your own custom-printed designs with ImagePoint®.

Our bedding is known for comfort, performance, beautiful designs, handsome detailing, and above all else, a good night's sleep. Whether you're seeking contemporary or traditional designs, our fabrics deliver warmth without weight, and style with substance.

We also offer a variety of stocked bedding options that are in stock and ready to ship.

top covers + throws

Our top covers and throws are stylish, durable, and most important—*incredibly comfortable*.

pillows + bed scarves

Decorative pillows are the perfect way to give your design a vibrant splash of color or a subtle stylish accent. Bed scarves give your bed a more complete and visually distinctive look.

bed skirts + box spring covers

The perfect bed skirt can tie all the visual elements of the bed together with the rest of the room, truly bringing your vision to life. Some designs call for simple, understated visual elements, like the surprising style of a box spring cover.

glassboards

SWING CHANGEABLE GLASSBOARD

Glassboards are naturally anti-microbial, making them the ideal communication tool for hospital rooms, nurse stations, and other areas where patient health is the highest priority.

ghent® glassboards

Glassboards are great for collaboration at offices and hospitals. A glassboard is different from a traditional whiteboard because it's much more durable and does not streak or stain from dry erase markers. Glassboards are naturally anti-microbial, extremely strong and durable, and can be used with dry-erase markers, permanent markers, and even grease pens.

GLASSBOARD BENEFITS

- Use of boards in hospital rooms improves patient experience and increases overall patient satisfaction by 6.3 points compared to rooms without boards. This leads to higher HCAHPS (Hospital Consumer Assessment of Healthcare Providers and Systems) survey scores.
- Hospital-grade cleaners have been tested and approved for surface cleaning.
- Ghent® whiteboards with custom graphics are resistant to scratching, ghosting, and staining with patented VividShield™ coating.

WHY GHENT® GLASSBOARDS?

As a premium supplier of visual communication tools, Ghent® is your one-stop shop for blended solutions to enhance your office, conference room, workspace, or hospital room.

- Made in USA, Ghent® controls product processes the entire time from sourcing to assembling. This allows Ghent® to reduce manufacturing waste and ensure any scraps are recycled.
- Ghent® Healthcare's *Swing Changeable Glassboards* are the perfect communication tool for any healthcare environment. The glass writing surface swings out from the wall to remove the interchangeable insert – ideal when wall space is limited.
- *Aria* and *Harmony* boards are both BIFMA LEVEL 2 Certified and are the first and only glassboards in the market to earn LEVEL certifications.
- Ghent® showed results of 7.01% reduction of greenhouse gas according to GRI (Global Reporting Initiative).

custom-printed solutions

Our digital printing solutions provide unlimited options for designing healthcare environments that promote a sense of comfort and wellbeing. From windows to bedding to privacy and shower curtains, digital printing is a cost-effective solution that brings unique design ideas to life.

imagepoint®

What will you create?

Bring your imagination to life with ImagePoint® printed décor. Unlimited color selection. Boundless design possibilities. Supply your own art or work with our talented designers to conceive your special style. Coordinate design elements—duvet covers, top sheets, pillows, shams, bed skirts, bolsters, solar shades and even draperies.

With digital storage, your exclusive design is always available, never discontinued. Small re-order quantities are welcome; order only what you need. Permanent colors penetrate the fabric for lasting brightness, wash after wash. Immerse your patients and residents in comforting design.

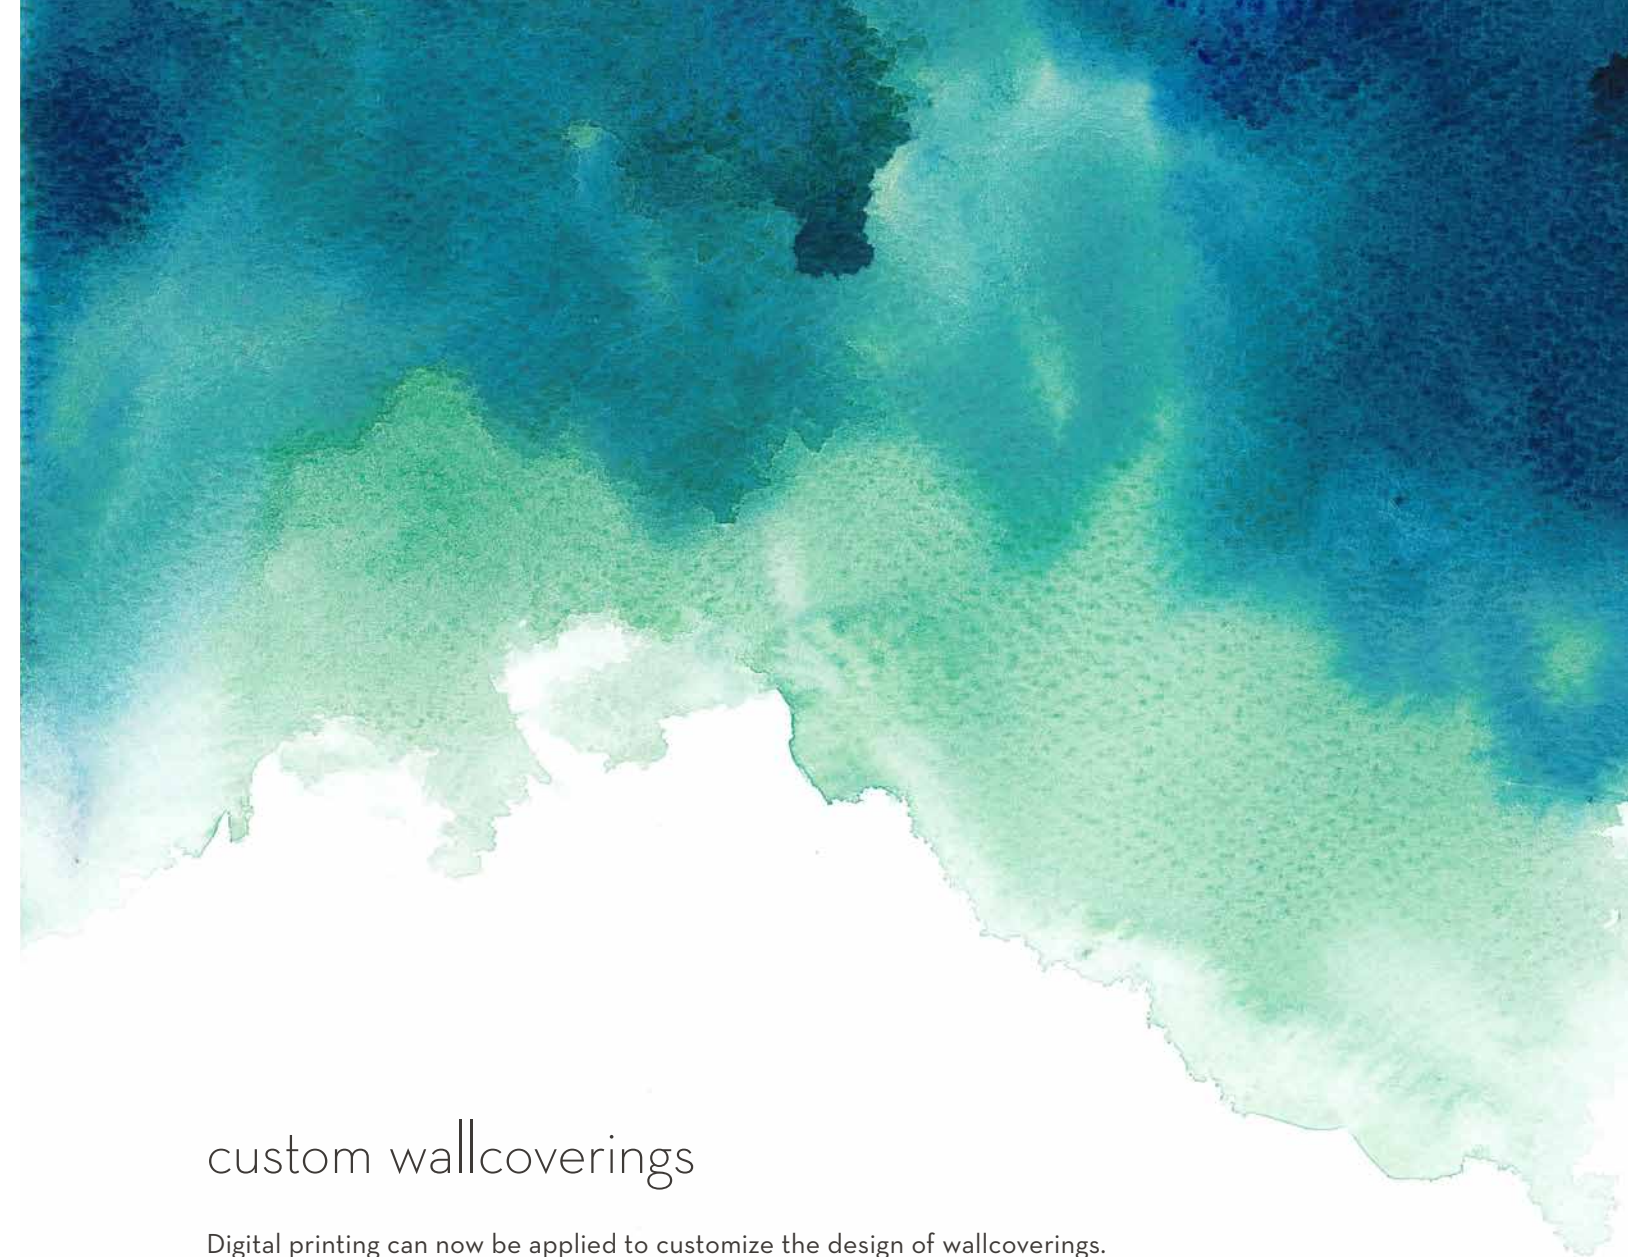

CUSTOM IMAGEPOINT® SOLAR SHADES

CUSTOM IMAGEPOINT® WALLCOVERING:
IVYLEAGUE-V1-PRIMARY

CUSTOM IMAGEPOINT® CAFETERIA WALLCOVERING

custom wallcoverings

Digital printing can now be applied to customize the design of wallcoverings.

Reinforce a facility's brand, highlight local landmarks, or reflect a unique expression.

We offer various substrates to accommodate different environments. Wallcoverings are available pre-pasted or unpasted. Constructed to withstand knocks, wallcoverings are more durable than paint and easier to clean. All wallcoverings are flame resistant.

Our national team of installers are professionally trained and certified.

sustainability

Environmental issues are increasingly shaping the context of how we live and how we operate our businesses. The cost, availability, utilization, and management of energy and water, as well as the chemistry used in manufacturing and processing our products, have environmental implications.

a sustainable partner

At Standard Textile, we're proud to offer sustainable options that help businesses achieve their sustainability goals without compromising on design or performance. Our SEAQUAL® Initiative fabrics take sustainability to the next level by turning marine litter into high-performance privacy curtains. Crafted from SEAQUAL® YARN, these fabrics are made from recovered ocean plastics, turning waste into valuable resources.

We've developed a culture of sustainability within our company, enforcing new environmental principles in our supply chain, product development, and innovation. We are also committed to helping our customers reduce their energy, chemical, and water consumption through thoughtful innovation and meaningful inspiration.

Through continuous improvement, we are constantly finding ways to reduce our environmental impact.

global supply chain

With manufacturing and distribution facilities in 24 countries, including North America, Europe, the Middle East, and the Far East, and over 1,300 dedicated associates, we deliver innovative, high-value solutions to our customers worldwide.

innovation

Standard Textile Interiors Group designs innovative solutions that transform spaces with people in mind. From energy-efficient window treatments to durable decorative fabrics, our products combine function, comfort, and safety—tailored to the needs of healthcare, hospitality, and education.

Product development, testing, and prototyping are conducted in our one-of-a-kind, world-class textile development and processing center we call the “CORE.” Innovation is core to our success, so we’ve invested in creating a mini-manufacturing facility, industrial laundry, testing laboratory, and finishing workroom at our corporate headquarters in Cincinnati, Ohio. Regularly, customers visit the CORE to learn about our innovation process.

Our Global Institute for Innovation + Leadership, also located on the campus of our corporate headquarters, is a dedicated space for customers and partners to discuss and solve real business challenges.

We invite you to visit us. Together, we’ll discover new ways to improve experiences.

Reach out to your local consultant or management team for questions or to place an order.
