

RISK IDENTITY GOWN

RISK IDENTITY GOWN
Healthcare Apparel by Standard Textile

Visibility and value.

SEE AT-RISK PATIENTS AT A GLANCE.

The Risk Identity Gown is intended to help your staff more readily identify and monitor patients deemed at risk for falling, elopement, and other conditions. It is offered in Kaleidoscope Yellow, consistent with the industry standard. This is available in three sizes (Large, 3XL, 10XL). Color-coded neck binding makes size identification easy. The 48" length is well suited for a patient population that is often elderly and shorter in stature, and the generous 68" sweep accommodates all body types.

SMARTLY DESIGNED.

This lapover design includes stainless steel floating-ring metal snaps at the neck and waist, providing a relaxed fit that preserves patient modesty. The Risk Identity Gown also features IV sleeves with snaps and a flat offset telemetry pocket with buttonhole. Soft, heavyweight fabric ensures all-day comfort.
